## PROJECT DETAILS

### Knowledge Management Portal

A full-stack basic KM portal application developed using Django Framework. The users can register and login to the website and can read the information about our department. The users can also download study material through the portal. Developed using Frontend: Html, CSS, JavaScript ,Backend: Python, Database: SQLite-3.

### Blog Application

Developed blog application using React.js, Recat Hooks, BootStrap, REST API's, Firebase. The user can Login to the site and can read any blogs related to G-NEWS.

### To-Do List

Developed a Todo-list application, where user can make their own Todo-list, using HTML, CSS and JavaScript.
